About Scolmore®

Since our incorporation in 1989 we have grown to become a leading player in the electrical accessories market. The company is proud to be a British-based, family-run business and has earned itself a reputation worldwide for quality, reliability and innovation. As technology continues to drive the electrical industry, with the focus on smart homes and building automation, Scolmore's investment in R&D ensures that the very latest technologies are harnessed to provide installers, contractors and specifiers with the most cost-effective, time-efficient solutions across a broad range of domestic and commercial applications.

Central Location - England

Based in the Midlands at our purpose built 150,000sq ft Head Office and Distribution Centre, we are ideally located to design, develop, manufacture and distribute our ever-expanding product range worldwide.

Delivering New Products

Our New Product Development Team are constantly tracking market trends, approval standards and providing customised products according to unique specification. This ensures we continue to increase our product range to meet the ever-changing needs of our customers.

The Home of Click®

We are committed to providing a comprehensive range of reliable, high quality and competitively priced products to our customers, whilst also offering a bespoke design and manufacture service to ensure we provide exactly the right solution and product for any installation or project. We're proud to say our customers can trust Click® to get the job done!

A People Business

Scolmore® Group is a Company that revolves around people – our team, our customers and the strong relationships we build and maintain through our consistent high levels of service and delivery. MD, Gary Mordue strongly believes the dedication and skills of his team have contributed to the continuing success of Scolmore®: "The Company is very much built on people. Each individual makes a unique contribution to the business and its customers. The professionalism, skills and knowledge of our team throughout the business allow us to deliver every customer the product they need, when they need it, high quality at the best price."

Visitors centre

The recent expansion and total redesign of the Scolmore® Visitor Centre has created a state of the art showroom and conference centre and an ideal backdrop to showcase an ever-expanding range of Scolmore® Group products.

Now with the ability to accommodate up to 60 guests, it is the ideal venue to host a range of events including product launches and demonstrations, training courses, meetings and corporate and industry events.

We actively encourage our customers to make use of these facilities for meetings and presentations. We are happy to arrange product training sessions on request and look forward to welcoming people to the Visitor Centre.

For more information please contact your area sales or the Marketing Department on 01827 63454.

The robust polycarbonate construction can be enhanced further by encasing the body in an additional metal enclosure, providing excellent vandal resistant protection.

Upgrade your home...

The Click Smart® wireless control and automation product range allows the upgrade of an electrical installation to provide added security, energy saving, comfort and control without the need for intrusive and unwanted disturbance to the décor.

Retro-fit and affordable, the products are quick and easy to install and will transform any premises – home or business - bringing numerous benefits to the occupants.

Download the
Click Smart® App

Available from App store and Google play store

From Simple Switching... To Complete Automation

Uses for Click Smart®:

1. Add an additional switch to an existing light without the need for any cabling.

Just fit the RFSAI-61B into the light you wish to activate and the RFWB-20/G switch to a convenient place.

You can now easily turn the bathroom light on from the comfort of your bed.

2. Fix flickering by using a retractive switch instead of a rotary dimmer (wired).

When you switch on one of your lights with a rotary dimmer do you experience continuous flickering?

Replace the wired rotary dimmer with the retractive switch and add the RFDEL-71B to the light fitting. No more flickering.

3. Two-way dimming control from separate locations (wired).

Make your home smarter with a RFDEL-71B and two retractive switches.

This will allow you to dim from both locations, meaning no more risky trips down the stairs in the dark.

4. Adding a switch to an outdoor socket for multiple appliances

Simply add the RFSAI-61B to the socket you wish to control. Then add the RFWB-20/G switch to the convenient place.

By adding a smart switch you can now control anything plugged into the socket.

essentials™

The essentials™ product group is just that – ESSENTIAL

The Essentials™ group of products comprises a range of items required for a wide variety of installations, such as junction boxes, flush mounted switch and socket boxes.

Ezylink (GA100) dry lining wall box connector

StudBox®

Scolmore® introduces the StudBox®, saves on time and cost.

It replaces the time-consuming and tedious practice of installing metal back boxes into stud walls attached to timber noggins, and will typically reduce the installation time down from five minutes to 30 seconds.

There are plasterboard marking points on the corners of each StudBox® cavity which provide the exact position to cut out without the need for measuring.

There are 3 products within the StudBox® range – 1 Gang (120mm – 600mm centres), 2 Gang (130mm – 600mm centres) and the Universal StudBox®

flow™

Simple connectivity and control

Flow™ is Scolmore's quick-connect system designed to speed up installation and allows quick and simple removal of the unit when carrying out routine maintenance, circuit testing or replacing components. This means testing procedures can be carried out quickly, accurately and effectively, with minimum disruption.

Deco-rative accessories for Hotel Indigo, York

Products from Scolmore's vast wiring accessories collection have been specified and installed in the boutique Hotel Indigo® in York, which has been brought to the historic city by InterContinental Hotels Group (IHG), one of the world's leading hotel companies.

The intimate hotel, situated on Walmgate, is perfectly situated within prime reach of some of the city's most outstanding restaurants and bars, boutiques, artisan shops, famous tea-rooms, museums and galleries.

Guestroom interiors hint at Walmgate's chocolate heritage, including Rowntree (the famous English confectioner started life in this neighbourhood in 1725). Switches and sockets in a

satin chrome finish from Scolmore's Deco® range have been fitted in all 101 bedrooms.

Deco® is a range decorative metal wiring accessories and the Deco brand has become synonymous with high specification, high quality, long life and unprecedented value for money. Deco® switches feature the same modular switch design as Scolmore's moulded ranges, which means that all the switch modules featured in the dedicated modules brochure can be used in any combination on Deco® accessories. All Deco® 13A Sockets and Fused Connection units are tested and approved to BS1363 offering assured quality and safety.

Lighting up multi-million pound hotel complex

Our Deco® wiring accessories and energy-efficient Inceptor Micro downlights have been installed throughout the bedrooms and corridors of the multi-million pound, 160-room Hampton by Hilton hotel complex which has recently opened in the centre of Newcastle upon Tyne.

Built opposite Newcastle Centre Station, which has itself undergone a significant makeover, the eight-storey hotel complex boasts impressive views over the city from its guest bedrooms, and facilities include a bar and lounge, a gym and a work area for business travellers - all open 24 hours a day.

Approximately 1600 of our innovative Inceptor Micro LED Downlights are providing an energy efficient lighting solution at the new complex.

Inceptor Micro is a fire-rated, integrated LED downlight with a high-powered, compact, pre-wired driver and flow connector. The compact size of the driver means they can be fitted into a very shallow recess depth of just 50mm—making them some of the most flexible fittings currently available. They come with a choice of Fixed and Adjustable Bezels

Deco® is a comprehensive collection of decorative metal wiring accessories in assorted plate finishes. The range is renowned for its high specification, high quality, long life and unprecedented value for money.

The hotel is the first Hampton by Hilton property in Newcastle and joins more than 30 Hampton by Hilton trading or under development hotels in the United Kingdom.

A la mode for Greenfields Community Housing

Scolmore® Group's Mode® wiring accessories have been specified for installation throughout Greenfields Community Housing properties in the Braintree District, Essex. Greenfields Community Housing's stock currently numbers around 8,500 homes, which are situated all over the Braintree District; covering Braintree, Witham and Halstead and many surrounding towns and villages.

Selected for the flexibility that its modular design offers, Mode is a stylish, contemporary and flexible range of smooth profile wiring accessories, with modern lines, which make it perfect for many applications. The modular design of Mode gives installers unprecedented flexibility in creating dedicated wiring solutions that meet specific wiring needs.

Greater Manchester's Metrolink

The UK's largest urban tram network - Greater Manchester's Metrolink - is utilising Scolmore Group's Flow Connector system to help provide lighting at the Tram stops across the network.

Click Flow is an all-in-one junction box and connection system, which provides a quick and easy solution when adding lighting or appliances to an existing circuit.

The Hub CT300 is designed to accept the Flow range of 3 or 4 pin plug-in connectors and can be connected directly to another Hub or via the three options of 2M, 3M and 5M link cables which are also part of the range. CT103M and CT203M 3 pole and 4 pole male only connectors are also available to provide extra outgoing supplies from the Hub when required.

The Click Flow range also includes: The CT101C - the original 3 pin plug connector, now featuring increased load handling with 20A rating and with additional loop terminal. The CT102C & CT103C - 3 pin plug connectors with screw or fast fit cord restraint options. The CT202C & CT203C - 4-pin connectors with auxiliary terminals which provides the opportunity for a second switched live or permanent feed for use typically with emergency lighting applications

Metrolink is one of the most successful light rail systems in the UK, carrying around 22 million passengers every year. Since the first lines to Bury and Altrincham opened in 1992, the network has more than doubled in size, with lines to Eccles, Oldham and Rochdale, Droylsden, Chorlton and MediaCityUK bringing passengers into the heart of Manchester city centre.

Trams now run to 65 stops covering 70km of track – and the multi-million pound expansion of the system continues, with Metrolink set to become the largest urban tram network in the UK. With new lines, a fleet of state-of-the-art trams, on-stop ticket machines and improved passenger facilities and information, Metrolink is the UK's premier tram network.

Scolmore® experiences World of Wedgwood

Set up in 1759 by Josiah Wedgwood, the grandfather of naturalist Charles Darwin, the 256-year-old Wedgwood Company, in Staffordshire, is one of the oldest in the world. When it came to refurbishing and developing the £34m World of Wedgwood Attraction, products from across Scolmore® Group's wiring accessories range were specified for installation.

This extensive project included the refurbishment of the existing building, creating new manufacturing facilities, offices and catering facilities, as well as new builds that included the Wedgwood experience Tea room, Kitchens and a new extension to the museum. Products from the Mode®, MiniGrid® and Metalclad ranges were selected for installation throughout and included switched socket outlets, fused spur connection units, along with switches and dimmer switches and a host of wiring accessories products.

Mode® is a stylish, contemporary and flexible range of smooth profile wiring accessories. The modular design of Mode® allows designers and installers unprecedented flexibility in creating dedicated wiring solutions to deal with specific wiring needs. The MiniGrid® range of interchangeable plates and switches allows for simple, single screw installation of the modules on the mounting plates and has encouraged contractors to devise and install customised switching solutions on site. The comprehensive selection of metal clad accessories are electrochemically coated plates and back boxes to provide a durable and long lasting heavy duty finish.

Senior Project Manager, Graham Collins, of Imtech ES Central, was responsible for installing Scolmore's wiring accessory products for this project and had this to say: "We have found Scolmore® a reliable and cost effective solution to both the needs of Wedgwood and Royal Dolton. The ease of installation that their products offer, is a highly valuable benefit to our Electricians."

“At Scolmore® the whole business is focused on the customer. Our forward thinking and investment for the future together with our dedicated employees enable a dynamic working environment that provides the platform for continued growth. It is our aim to provide the best possible package of products and service for our distributors and the installers who purchase and fit our products, ensuring that everyone gains maximum benefit when choosing Scolmore®.”

Ian Hunter
Sales Director

Sales Office

Based alongside our distribution facility, the busy sales office provides a central point of contact for all customer service requirements. The professionalism, skills and knowledge of our internal sales team enables us to provide the high standard of service that we know our customers expect. Our on-line ordering facility is also managed within this office.

In-House Studio

All marketing support including product literature and point of sale material is designed by our dedicated in-house design team. This facility enables us to offer bespoke marketing support to our customers. The availability of an on-line Marketing Hub and dedicated Marketing Support brochure provides stockists of Click® products with a range of tools to enhance their own marketing activities.

Product Development

Click® products are designed with our customer / the installer very much in mind. Our purpose built facilities and dedicated product development team, based in the UK allow us the flexibility to design and develop these products based on customer feedback and market research, ensuring we are producing a relevant, reliable and quality range of products.

Working harder for you

Sales Structure

The external sales team has been expanded and restructured to enable Scolmore® to meet the ever changing needs of the market. As a result the sales force is now able to offer dedicated team members for distributors and contractors at local level, as well as for national accounts and also provides specification contacts to generate demand with specific customers. This gives us the ability to have a focussed approach in line with our business development plan.

Warehouse / Service

Our centrally located 150,000sq ft Warehouse and Distribution Centre allows us to deliver our products on time, every time.

Stock

Over 7000 Click® product lines with a stock value in excess of £5 million are held at our Central Distribution centre in the West Midlands at any one time. This means we are able to offer 97% availability on stock at any given time.

Distributor Network

Scolmore® has over 2000 trading accounts providing a comprehensive network of wholesale outlets covering the whole of the UK. These are a combination of Independent Wholesalers, National Wholesale Groups and Buying Consortiums. The company sales strategy is to ensure that all Scolmore® products are available local to the requirements of the installer and specifier.

Supporting our Industry

Scolmore® is committed to supporting the electrical industry and on a regular basis is actively involved in a number of initiatives with leading industry bodies ELEX, NICEIC, ECA, EDA, NAPIT & SELECT.

NICEIC Apprentice of the year

As a company we understand the importance of investing to develop new talent for the future of the industry. Our commitment has led to collaboration with NICEIC and ELECSA to establish the national Electrical Apprentice of the Year competition. First launched in 2015, the competition has grown in reputation and is now firmly established on the annual calendar of events for everyone involved in the industry.

The Marketing Hub is the latest update to the Scolmore® website giving customers the opportunity to enhance their own Marketing facilities with very little effort or cost. A selection of templates is available featuring many of our popular products. These templates can be customised with our stockists' details to provide maximum impact and optimise local sales opportunities.

Mobile Showroom

The eye-catching, branded vehicle transforms into a spacious and stylish showroom, fitted out with the very latest products which are mounted on display panels. With room for a hospitality table and concealed storage for presentation materials and samples, the air conditioned, fully glazed unit provides an ideal space in which to host seminars and presentations and provide product training sessions for visitors.

ESP® (Elite Security Products) Ltd is a market-leading supplier of a comprehensive range of electronic security and fire protection products.

Formed in 1985, the company focusses its attention on providing innovative solutions for the evolving security market.

The emphasis of activity has been on the development of security related products specifically for the UK electrical trade. By keeping a close eye on the new technology that is emerging from the professional security sector and gauging the right time to introduce it to the electrical contract market, ESP® helps customers stay one step ahead.

ESP® has been part of the Scolmore® Group of companies since 2011, and whilst the company operates independently, ESP® benefits from the expertise, knowledge and support of the Scolmore® Group and continues to create strong growth within its product categories.

ESP's comprehensive portfolio includes Exterior Deterrent systems (External Area Protection Systems), CCTV, Access Control, Fire Protection and Emergency Lighting products.
